Team 03

Project Title – Voltix AI

Project Time Frame – 2 Semesters

Team Members

Krish Jitesh Gohil, Kanwar Singh Sandhu, and Shashank Nanda. Krish Jitesh Gohil will serve as the team leader and will be responsible for overall coordination, decision-making, and communication with the professor when necessary.

Team Leadership and team roles

All team members will contribute as full stack developers. Each member has prior experience in developing full stack web applications, and the team collectively aims to explore and expand its knowledge in the field of artificial intelligence, with a particular focus on large language model (LLM) development as part of this project.

Team Meetings

The team will conduct meetings once per week, preferably on Thursdays or Fridays. Meetings will be held online unless an alternative arrangement is discussed and agreed upon by all team members in advance.

All project-related communication will take place through the team WhatsApp group. This platform will be used to share updates, coordinate tasks, and communicate important decisions and deadlines to ensure transparency and alignment among all members.

Team Problems

In the event of any disagreements or issues within the team, the matter will first be discussed internally. The final decision will rest with the team leader. If a resolution cannot be reached, the issue will be escalated to the course professor for guidance and resolution.

Team Commitment

The undersigned members agree to work together on the project until the end of the PRJ666 next Semester. They recognize that as a team and individually they are equally responsible for the quality of all deliverables.
